

LEED Specification Sheet for New Construction and Major Renovation

6/22/2021

To Whom It May Concern:

This letter has been written to verify the VOC content of Multibond MX-90. The current VOC content of this product is 2.04 g/L. Accordingly, the VOC content of Multibond MX-90 is less than 30 g/L. That is the current VOC content limits of California's South Coast Air Quality Management District (SCAQMD) Rule #1168 for wood substrate adhesives.

In addition, Multibond MX-90 has passed California Department of Public Health CDPH/EHLB/Standard Method Version 1.2, 2017 (Emission testing method for CA Specification 01350). This is a requirement for obtaining LEED v4 low emitting materials credit.

Note that this product does not contain any urea formaldehyde.

Please use this letter for specification purposes and call 1-888-533-9043 with any further questions.
